## CORE SKILLS

**Game Design |** Game mechanics, Gameplay loops, Level design, Prototyping, Wireframing, Progression systems, Pacing, Economy & Balancing, Character Design, Comprehensive Design Documents (GDD), User testing.

**Software & Languages |** C#, C++, Blueprint Visual Scripting, Blender, MAYA, ZBrush, Adobe Creative Cloud (Photoshop, Illustrator, XD), Figma, Miro, Visual Studio, Rider, VS Code.

**Engines |** Unity Engine, Unreal Engine

## PROFESSIONAL EXPERIENCE

### Senior Game Designer | GameBee Studio

September 2024 – Present | Mumbai, Maharashtra

- Developed and optimized games using Unity Engine and C#, focusing on scalable performance for mobile, TV, and other platforms.
- Designed 3D assets and environments in Blender and created 2D art, UI, and textures in Photoshop to ensure cohesive visual quality.
- Crafted and balanced game mechanics, economy systems, and gameplay loops to drive engagement and optimize retention.
- Led project management, user testing, and optimization efforts, ensuring smooth production pipelines and polished final products.
- Key Commercial Projects: Chhota Bheem: Hidden Objects, Chhota Bheem: Cooking Mania, Sniper War.

### Game Designer | Ohilo

July 2023 – August 2024

- Generated innovative concepts for virtual reality (VR) and mobile gaming, focusing on pioneering ideas to enhance user experiences and drive engagement.
- Created wireframes, comprehensive documentation, and functional prototypes to explore and refine innovative game mechanics.
- Crafted novel gameplay systems and economic structures, integrating innovative design principles.
- Key Commercial Projects: Core Trials (IGDC GOTY Nominee).

### Game Designer | Godspeed Games

April 2022 – April 2023 | Pune, Maharashtra

- Developed and proposed novel game concepts tailored to client specifications, meticulously designing comprehensive documentation.
- Managed and meticulously designed the economy for a webshop within an in-game store, implementing strategic pricing strategies.
- Directed a proficient team in thoroughly testing newly developed game mechanism prototypes, delivering comprehensive feedback.

## Education

**Bachelor of Science in Game Design and Development**

Ajeenkya D.Y Patil University
Pune, Maharashtra

2019 - 2022

## Coursework

- Game Design Principles
- Game Development Fundamentals
- 2D and 3D Animation
- User Interface Design
- Game Programming in Unity
- Game Mechanics and Dynamics
- Storytelling for Games
- Game Testing and Quality Assurance
- Virtual Reality Development
- Game Marketing and Monetization Strategies

## Interests

Bike Riding • Fitness • Self-Improvement

## Professional Experience - Continue

### Game Designer | YUG Metaverse

February 2021 – March 2022 | Remote

- Led the design and development efforts for the Metaverse, overseeing the creation of virtual environments, user interactions, economic systems, and social dynamics.
- Planned and executed events within the Metaverse, such as India's inaugural Metaverse Wedding, the first Metaverse Holi celebration, and Valentine's Date on the moon.

## NOTABLE PERSONAL PROJECTS

- **BREACH (Solo Developer):** Created a neo-noir, glitch-themed platformer where players collect and stack shells to fuel chained double-jumps. Implemented the full gameplay loop, mechanics, custom player controllers, visuals, and level design using Unity.
- **Unreal Engine VFX (Technical Art):** Developed atmospheric particle tests and dynamic visual effects using Unreal Niagara.
- **Gothic Cemetery Environment (Environment Art):** Designed an atmospheric, detailed 3D level environment in Unreal Engine.
- **Extensive Pitch & GDD Library:** Authored 5+ detailed Game Design Documents and 13+ novel game pitches exploring unique mechanics and narrative structures.
