1. GAME OVERVIEW

Genre: Detective / Hidden Object / Puzzle
Target Audience: Children (Aged 8+) and Casual Players
Game Perspective: 2D static scenes with interactive UI

1.1 Game Summary

Chhota Bheem: Hidden Object Detective is a mobile puzzle adventure game. Players play as Chhota Bheem to investigate mysterious cases. Each case involves hidden object scenes, forensic, tech analysis and other mini-games, and a storyline that leads to solving a crime. The game includes an upgradeable detective office, collectible rewards, and episodic storytelling.

2. GAMEPLAY LOOP

1. Select a **Case** (Each case has 3+ Chapters).
2. Start by spending a **Badge**.
3. Complete HO scenes to gather clues.
4. Send clues to **Forensic** or **Tech Lab**.
5. Play analysis mini-games or wait timer.
6. Review suspect profiles and key findings.
7. Solve mystery → Earn **Coins** and **Progress**.
8. Complete optional **Street-Level Cases** to earn more **Badges**.

3. Gameplay

3.1 Main Cases

A. Hidden Object (HO) Levels

Scene Variants:

1. **With Hints**: Find listed objects by name.

Mechanics:

- Starting a case requires **1 Badge.**
- Combo and streak bonuses for quick and accurate taps.
- **Hint**: Players can use this consumable to find Hard-to-find objects. These hints can be purchased by spending gems.
- ~~Automatic hint with cooldown. Activates after every 15 seconds if the player has not found anything.~~
- Players can use a **pinch gesture** on the screen to smoothly zoom in or out, making it easier to locate hidden objects within the scene. Excluding the Card Match scene variant.

B. Forensic

Purpose: Examine physical evidence from HO scenes.

Requirement: 100 Coins to start Analysis.

Timer: 20 minutes base time (can be reduced with gameplay or skipped with gems).

Mini-Games: (These mini-games comes randomly to the player out of the available one)

1. **Match 3 Tiles:**
    - Complete the objective by matching and collecting the required tiles.
    - Successfully completing the task reduces the analysis time by **5 minutes**.
2. **Color Sort:**:
    - Arrange the colored water so each tube contains a single color.
    - Completing the task reduces the analysis time by **5 minutes**.

Handled by: Indumati (Forensic Expert)

C. Analysis

Purpose: Analyze gadgets, electronics, notes, objects, data, and digital data, decipher.

Requirement: 100 Coins to start Analysis.

Timer: 10 minutes base time (can be skipped or reduced).

Mini-Games: (These mini-games comes randomly to the player out of the available one)

1. **Match 3 Tiles:**
    - Complete the objective by matching and collecting the required tiles.
    - Successfully completing the task reduces the analysis time by **5 minutes**.
2. **Circuit Connect:**
    - Rotate tiles to restore electric flow on a circuit board.
    - Reduces analysis time by 5 minutes.

Handled by: Raju (Tech Expert)

3.2 Street-Level Cases

Street-Level Cases act as side quests that players can pursue alongside the main storyline. These cases provide valuable rewards such as **Coins**, **Badges**, and **Experience Points (XP)** upon successful completion. Street-Level Cases are designed to be quicker and repeatable content that encourages players to revisit previously unlocked areas while contributing to overall progression.

Scene Variants: These variants will be randomized for every new level.

1. **With Hints**: Find listed objects by name.
2. **With Jumbled Hints**: Object names are scrambled (e.g., "lpaep" for apple).

3. **Jigsaw Puzzle**: Players assemble pieces to reconstruct the crime scene.
4. **Find the Difference**: Two similar images with subtle differences.
5. **Silhouettes**: Find objects based on their outlines only.
6. **Same Objects**: Locate pairs or sets of identical objects in a cluttered scene.
7. **Card Match**: A total of 9 cards are displayed face-up on the screen for 3 seconds. After that, they flip face-down. The player must remember their positions and find the matching pairs by flipping the cards.

A. Objective:

Complete a mini-investigation by collecting 4 specific items related to a scenario such as theft, vandalism, robbery, lost property, or local disturbance. Each case presents a unique narrative but is not directly tied to the main arc.

B. Structure & Mechanics:

- **Case Scenario:** Each Street-Level Case is centered around a self-contained story (e.g., solving a local shop theft or identifying a graffiti artist).
- **Item Collection Goal:** Players are required to collect 4 case-specific items to complete the case. Players can skip this process by directly purchasing this item with Gems
- **Unlocked Environments:** Items can only be collected from environments that have already been unlocked through progression in main story cases.
- **Hint**: Players can use this consumable to find Hard-to-find objects. These hints can be purchased by spending gems.
- Players can use a **pinch gesture** on the screen to smoothly zoom in or out, making it easier to locate hidden objects within the scene. Excluding the Card Match scene variant.

C. Level Mechanics:

- Starting a Level requires **20 Energy Tokens**.
- Each level within an environment presents one of the required case items as a possible reward.
- Players must complete each level within a **time limit** to successfully retrieve the item.
- Levels will vary in difficulty and reward amount based on the time taken to complete.

D. Rewards:

Upon collecting all 4 items:

- The Street-Level Case is marked **"Closed"**.
- The player receives:
    - **Coins** (set reward)
    - **XP** (set reward)
    - **1 Badge** (used to unlock main case episodes).

E. Fixed Cases:

In the **Street-Level Cases** section, a set of **predefined cases** will be available. At any given time, only **two cases** will be visible to the player. Each case has a specific theme and requires collecting a fixed set of items to complete. Players can skip this process by directly purchasing this item with Gems

1. **Arrest**
   Objective: Gather essential law enforcement tools to apprehend a suspect.
   Required Items:
   - Taser
   - Bulletproof Vest
   - Handcuffs
   - Hand Gun

2. **Disguise**
   Objective: Gather essential law enforcement tools to apprehend a suspect.
   Required Items:
   - Wig
   - Fake ID
   - Smartphone
   - Glasses

3. **Surveillance**
   Objective: Gather essential law enforcement tools to apprehend a suspect.
   Required Items:
   - Microphone
   - Binoculars
   - Camera
   - Tape Recorder

4. **Car Chase**
   Objective: Gather essential law enforcement tools to apprehend a suspect.
   Required Items:
   - Jerry Can
   - Scissor Jack
   - Navigator
   - DVR

3.3 Replayable Environments

Replayable Environments allow players to revisit previously unlocked locations from the Main Story and interact with them outside their original narrative context. These environments serve as the core of **Street-Level Cases** and casual play sessions, offering opportunities to earn rewards, gather case items, and progress toward additional content.

A. Replay Access Rules

- Once an environment is unlocked through a **Main Story Case**, it becomes **permanently replayable**.
- These environments are reused for:

    - **Street-Level Cases**
    - **Direct Replay (Freeplay Mode)**

B. Gameplay Modes

1. **Street-Level Case Play:**
    - Players select an active Street-Level Case.
    - They must collect 4 specific items by replaying scenes in applicable environments.
    - Each scene completion contributes toward these objectives.
    - Scene variant is randomized at the start (mode or object placements differ each time).

2. **Freeplay Mode (Without Case):**
    - Players can enter a previously unlocked environment without selecting a **Street-Level Case**.
    - Completing the level in this mode provides a **random item** from any ongoing **Street-Level Case**.
    - This allows for passive progress even without manually activating a case.

C. Energy Requirement:

- Each environment replay consumes **20 Energy Tokens**.
- Energy regenerates over time or can be refilled using Gems.

D. Milestone Gift Rewards System:

- Environments can be played **multiple times**, and after every specific threshold (e.g., 15th, 25th, 40th, etc. playthrough), the player receives a **Bonus Gift**.
- Even if the Environment is played in the Main Case, First time/Second Time. It will be counted
- After reaching a threshold it resets back to 0 (e.g. If the player completes 15 Levels they get a reward, then the threshold resets back to 0 and the player has to complete 25 levels to receive the next reward.)
- These milestone gifts include:
    - **Energy Tokens**
    - **Coins**
    - **Gems**
    - **XP**
- A reward tracker or progress bar can be shown to encourage milestone completion.

E. Scene Variant System:

- Each time a player enters a replayable environment, the **scene variant is randomly selected**.

- **Variants include:**
    - **With Hints**: Find listed objects by name.
    - **With Jumbled Hints**: Object names are scrambled (e.g., "lpaep" for apple).
    - **Jigsaw Puzzle**: Players assemble pieces to reconstruct the crime scene.

- **Find the Difference**: Two similar images with subtle differences.
- **Silhouettes**: Find objects based on their outlines only.
- **Same Objects**: Locate pairs or sets of identical objects in a cluttered scene.
- **Card Match**: A total of 9 cards are displayed face-up on the screen for 3 seconds. After that, they flip face-down. The player must remember their positions and find the matching pairs by flipping the cards.

- This keeps gameplay fresh and replayability high, even in reused environments.

3.4 Scoring System

A. Object based scoring:

The object scoring system in hidden object levels is designed to reward speed, accuracy, and momentum. Players can earn significantly higher scores by maintaining a streak of quick and correct object finds.

- **Base Score:**
  - Each correctly found object grants the player **1,500 points.**
- **Combo Multiplier Mechanic:**
  - If the player finds another **object within 4 seconds** of the previous one, **a score multiplier** is activated.
  - The multiplier starts at x2 and increases by +1 for each consecutive object found within the 4-second window.
- **How it works** (example):

Find Sequence	Time Between Finds	Multiplier Added	Points Added
1st Object	-	x1	1,500
2st Object	Within 4 seconds	x2	3000
3st Object	Within 4 seconds	x3	4500
4st Object	Within 4 seconds	x4	6000
…	…	…	…

B. Timer Based Scoring:

Timer-based scoring applies specifically to **Street-Level Cases** and select **Challenge Levels**. This system rewards players for completing a level quickly, encouraging fast and efficient gameplay. The faster a player completes the level, the higher the **Time Bonus** they earn.

- **Scope of Use:**
  - **Active in:** Street-Level Cases, Limited-Time Challenges, and Time Trial Events.
  - **Not active in:** Main story cases (unless specified).

- **Time Allocation:**
  - Each level has a custom time limit, which is determined by the number of objects required to be found in that level.

- **Bonus Formula:**
  - Once the player completes the level, any remaining time is converted into bonus points.
  - **Time Bonus Formula:**
    $Time\ Remaining\ (in\ seconds) \times\ 103\ points$

- **Example Calculation:**
  - Level Time: 2:00 minutes
  - Completion Time: 1:22 minutes
  - Time Remaining = 38 seconds
  - Timer Bonus = 38 × 103 = **3,914 points**

- **Integration with Object-Based Scoring:**
  - The Timer Bonus is **added on top** of the Object-Based Score.
  - This combined score determines the final level score and rewards.

C. Non-Timer Based Time Scoring:

The Non-Timer-Based Time Scoring system is designed specifically for **Main Story Levels**. In these levels, players are **not restricted by a visible countdown timer**, allowing them to progress at their own pace. However, the system silently records the total time spent during gameplay and uses it to compute a **Time Efficiency Score**.

- **Scope of Use:**
  - **Active in:** Main Story Cases
  - **Not active in:** Street-Level Cases, Challenges, Time Trials

- **Objective:**
  - To reward players who complete story levels efficiently without rushing them. It strikes a balance between exploration and performance by offering a time-based bonus that decreases the longer a player takes.

- **Scoring Mechanism:**
  - The bonus is calculated based on how much time the player took versus a predefined **"Max Time"** (i.e., the longest acceptable time for full score). The formula ensures that players who finish quicker receive a higher score, while those taking too long receive little or no time bonus.

- **Score Formula:**
  - $Time\ Bonus\ Score\ = Max\ Score\ \times \left(1 - \frac{Time\ Spent}{Max\ Time}\right)$

- **Parameters:**
  - **Max Score:** The highest possible bonus score a player can earn if they complete the level instantly.
  - **Time Spent:** The actual time the player took to complete the level (in seconds).

- **Max Time:** The maximum allowed time before the time bonus becomes zero (in seconds).

- **Clamping Rule:**
  - If **Time Spent ≥ Max Time**, then **Time Bonus Score = 0**

- **Example Calculation:**
  - Max Score: 3000 points
  - Max Time: 300 seconds (5 minutes)
  - Time Spent: 180 seconds (3 minutes)
  - $Time\ Bonus\ Score\ = 3000\ \times\left(1\ -\ \frac{180}{300}\right)$
  - $Time\ Bonus\ Score\ = 3000\ \times (1\ -\ 0.6)\ = 3000\ \times\ 0.4\ =\ 1200\ points$

- **Integration:**
  - This **Time Bonus** is added on top of the **Object-Based Score** to form the **Total Level Score**.
  - Unlike challenge or side-quest levels, this scoring method avoids high-pressure gameplay, aligning with the exploratory and narrative-driven nature of Main Story levels.

3.5 Reward System

A. Level/Chapter Completion Rewards

A tiered coin reward system is applied in addition to the base level completion reward. Players receive extra coins based on their performance, with higher scores or faster completion times unlocking higher reward tiers.

- **Level Rewards (Base Reward)**

Level Type	Reward	
With Hints	40 Coins	50 XP
With Jumbled Hints	60 Coins	50 XP
Jigsaw Puzzle	45 Coins	50 XP
Find The Difference	40 Coins	50 XP
Silhouettes	70 Coins	50 XP
Same Objects	50 Coins	50 XP
Card Match	55 Coins	50 XP

- **Timer Based Level Rewards (Timer remaining)**
  - **How it works:**

Time Remaining	Reward
0-10 Sec	2 Coins

11-30 Sec	5 Coins
31-60 Sec	12 coins
61-90 Sec	18 Coins
91 Sec and above	22 Coins

- **Non-Timer Based Level Rewards (Time Spent)**
  - **How it works:**

Time Spent	Reward
0-30 Sec	15 Coins
31-60 Sec	12 Coins
61-90 Sec	8 Coins
91-120 Sec	6 Coins
124-150 Sec	4 Coins
151 Sec and above	0 Coins

B. Main Case Completion Rewards

Upon successfully completing a case, players are granted the following rewards as a token of their progress and performance:

- **Coins:** 400
- **XP (Experience Points):** 250
- **Gems:** 20
- **Energy Tokens:** 60

These rewards are fixed per case and serve to motivate continued progression through the game.

C. Street-Level Cases Completion Rewards

Upon successfully completing a Street-Level Case, players are granted the following rewards as a token of their progress and performance:

- **Coins:** 200
- **XP (Experience Points):** 100
- **Badge:** 1

D. Milestone Gift Reward

Milestone Reached	Reward

	Coins	Gems	Tokens	XP
15 Levels Completed	350	10	60	250
25 Levels Completed	500	15	80	300
40 Levels Completed	750	20	Full	450
50 Levels Completed	1000	25	Full	500

3.6 Power-Ups

A. Hint

Description:
When used, the Hint tool highlights the exact **location** of one hidden object in the current scene. It provides a quick visual cue (e.g., a sparkle effect, glow, or pulse animation) directly over the item's position, helping the player find it instantly.

Mechanics:
- Activates a highlight on **one item** in the scene.
- The highlighted item remains visible for a few seconds or until tapped.
- Can be used at any time during a scene (subject to cooldown or item availability).
- Does not guide or point, it directly reveals the object's spot.

B. Compass

Description:
When activated, the Compass points the player toward the direction of **three hidden objects**, one at a time. After each item is found, the compass automatically updates to guide the player to the next one in sequence — all within a single use.

Functionality:
- **One Compass use = guidance for 3 hidden items**, in order.
- Displays a directional arrow or marker pointing toward the current target item.
- Once the first item is collected, the compass seamlessly updates to the second, and then the third.
- Ends after the third item is found.
- Can be used again if the player has additional Compass charges.

C. Ink Quill

Description:
Automatically finds and collects **three hidden items** in the current scene. The player does not need to interact with the scene, the items are removed from the list instantly.

Functionality:
- Instantly removes **3 items** from the active object list as if the player found them.
- May show a brief animation or effect over the collected items (optional).

- Prioritizes the first 3 items in the List.
- One-time use per Ink Quill. Players can use multiple quills if available.

4. PROGRESSION SYSTEM

4.1. Currencies

A. Coins

Coins are the primary in-game currency awarded to players for completing levels, cases, and challenges. They serve multiple purposes within the game and are essential for progression. Players can use coins to:

- **Customize their Detective Office** with visual upgrades and decorations.
- **Initiate Tech and Forensic Analyses** required for progressing through certain cases.

B. Gems

Gems are a premium in-game currency used to unlock special advantages and speed up progress. They allow players to:

- **Refill Energy Tokens** instantly to continue playing without waiting.
- **Skip Analysis Timers** for both Tech and Forensic investigations.
- **Purchase Hints** during gameplay to locate hard-to-find objects.
- **Gain Extra Time** if a level is about to fail due to timeout.

Gems are awarded through various in-game achievements and events, including:

- Completion of Main Cases
- Reaching Level Milestones
- Participating in Limited-Time Live Ops Events

C. Badges

Badges act as a key progression resource in the game. They are **required to unlock and begin Main Cases**, making them essential for advancing through the core storyline.

Players earn Badges by successfully completing **Street-Level Cases**, which serve as side missions. Each completed Street-Level Case grants **1 Badge**, encouraging players to engage with additional content outside the main narrative.

Badges not only mark a player's accomplishments but also ensure steady progression by balancing side and main content.

D. Energy Tokens

Energy Tokens are the core resource required to play levels within the game, including **Street-Level Cases** and **Free Mode** levels. Each level attempt **consumes 20 Energy Tokens**.

Mechanics:

- **Total Energy Capacity:** Players can hold a maximum of **100 Energy Tokens** at any given time. However, if a player receives additional Energy Tokens as a reward while already at maximum capacity, the extra tokens are **stacked on top of the current total** instead of being discarded.

  Example:
  If the player already has **100/100 Energy Tokens** (full capacity) and receives **+40 Energy Tokens** as a reward, the total will display as **140/100**.

- **Recharge Time:** Once fully depleted, Energy will begin to regenerate over time. It takes **200 minutes** (3 hours and 20 minutes) for a full recharge from 0 to 100.
- **Office Upgrade Bonus:** Players can reduce the recharge time by **upgrading the Detective Office**. Each upgrade decreases the **total recharge duration by 2 minutes**, improving overall gameplay flow and reducing downtime.

Usage:

- **Used for:** Starting Side Missions and Free Mode Levels.
- **Cost per level:** 20 Energy Tokens.
- **Recharge boost:** Unlock faster recharge through Office upgrades.

Calculation:

- 100 Energy → 200 minutes
- So, 1 Energy → 2 minutes

4.2 Detective Office

The **Detective Office** serves as the player's central hub and can be visually upgraded over time. Players can enhance the look and functionality of their office by purchasing and placing new items like chairs, laptops, decor elements, and more.

Functional Benefits:

Upgrading the Detective Office not only improves aesthetics but also **reduces the energy recharge time**.

- **Each upgrade** decreases the **total energy recharge**, allowing players to resume gameplay faster.
  - **Tier 1:-** Reduces 1 Min
  - **Tier 2:-** Reduces 2 Min
  - **Premium:-** Reduces 5 Min
- The tier based upgrades time reduction cannot be stacked.

Item Categories:

All upgradeable items are grouped into three categories based on value and availability:

- **Tier 1:** Basic items, affordable and priced at a base value (e.g., 100 coins).
- **Tier 2:** Mid-tier items, always priced higher than Tier 1 counterparts.
- **Premium:** Exclusive items only unlocked by purchasing a **Gift** from the in-game store.
    - The Gift item randomly unlocks **one premium upgrade item**.

Upgradeable Areas:

Players can upgrade the following sections of the Detective Office:

- **Bheem's Cabin:** Personal space with visual and functional upgrades.
- **Garage:** Where equipment or tools may be displayed or stored.
- **Raju's Cabin:** Supporting character's workspace with unique upgrade options.
- **Chutki's Reception:** Front desk area with aesthetic enhancements.
- **Indumati's Lab:** Scientific zone where forensics or tech analysis takes place.

4.3 Player Level

Players gain **XP (Experience Points)** by completing levels, solving cases, and reaching major milestones throughout the game.

As players level up, they unlock new features and customization options, enhancing both gameplay and personalization.

XP Sources:

- Solving **Main Cases**
- Solving **Street-Level Cases**
- Completing **Levels**
- Hitting **Progress Milestones** (e.g., completing a chapter or event)

Level-Up Rewards:

Each time a player levels up, they unlock:

- **New Office Decorations** – Fresh items to upgrade and personalize the Detective Office.
- **Player Avatars** – Alternate character icons and profile visuals for identity customization.

5. Live-Ops

5.1 Daily Challenges

The **Daily Challenge** is a special time-limited event mode designed to encourage daily engagement and test the player's speed, accuracy, and adaptability. The challenge refreshes every **24 hours**, ensuring a fresh set of levels each day.

A. Objective:

- Complete **6 sequential levels** within a total time limit of **6 minutes**.
- Each level features a **different scene variant**, keeping gameplay unpredictable and visually engaging.

B. Rewards:

Successfully completing the Daily Challenge grants:

- **500 XP**
- **800 Coins**
- **100 Gems**
- **Full Energy Token Refill**

C. Gameplay Rules:

1. **Time Limit** – The **6-minute timer** begins as soon as the first level starts and continues across all 6 levels.
   No Pauses – The timer does not stop during gameplay.
2. **Sequential Play** – Players must complete each level to move on to the next. Skipping is not allowed.
3. **Scene Variants** – Each level in the challenge uses a scene variant (e.g. With Hints, Jigsaw, Card Match, etc.)

D. Failure Conditions

- If the **6-minute limit** expires before all 6 levels are completed, the challenge fails. Failure does not consume any additional Energy Tokens, but no rewards are granted.

5.2 Spin Wheel

The **Spin Wheel** feature allows players to earn exciting rewards through a daily spin. Every player is granted **one free spin per day**, offering a random reward from the prize pool. Players can spin a wheel daily and get one reward.

A. Possible Rewards

Rewards
50 Coins
1 Diamond

Rewards
10 Energy Tokens
20 Coins
5 Energy Tokens
80 Coins
10 Energy Tokens
1 Diamond
100 Coins
1 Random Inventory Item

B. Extra Spins

- Players can spin the wheel again by **purchasing Spin Tickets** from the in-game store.
- **1 Ticket = 1 Spin**.
- Additional spins increase the chance of earning rare or premium rewards.

5.3 Daily Rewards

The **Daily Rewards** system encourages players to log in consistently by offering a **7-day reward streak**. Each consecutive day of logging in grants a specific reward, with the **7th day** offering a **mega reward**.

If the player **misses a day**, the streak is broken and resets back to **Day 1**.

Reward Schedule:

Days	Rewards
Day 1	50 Coins
Day 2	10 Energy Tokens
Day 3	80 Coins
Day 4	3 Gems
Day 5	100 Coins
Day 6	5 Gems
Day 7	1 Random Premium Item

5.4 Idle Rewards

The **Idle Rewards** system is designed to re-engage players who have been inactive for a certain period. If a player logs back into the game **after 3 consecutive days of inactivity**, they will receive a special **Welcome Back Reward** to encourage continued play.

Rewards
400 Coins
10 Diamonds
50 Energy Tokens
200 XP

6. Story

The game begins with **Case 1: The Royal Crown of Dholakpur**, which serves as both the opening story and the **First-Time User Experience (FTUE)**. This case is designed to introduce players to the world, the characters, and the core gameplay mechanics in a natural, story-driven way.

The narrative unfolds through a series of **cutscenes**, where characters interact and exchange dialogues that reveal the mystery and guide the player forward. These conversations not only set the tone and context for the case but also establish the relationships between the key characters.

After each cutscene concludes, the player is presented with an **interactive panel** prompting their next action. For example, a character might suggest, *"We should check the basement for clues,"* and immediately after, the player receives a panel with the objective: **Investigate the Basement**. This structure keeps the flow intuitive—story moments seamlessly transition into gameplay tasks.

Purpose:

- Serves as the **introduction to the game's story world**.
- Functions as the **First-Time User Experience (FTUE)** by teaching core mechanics through narrative progression.

Structure:

1. **Introduction Cutscene**
    - Characters are introduced.
    - Context of the missing Royal Crown is established.
    - Dialogue highlights the urgency of the case and sets up the player's first objective.
2. **Guided Gameplay Segments**
    - After each cutscene, the player is presented with a **task panel**.

    - These panels define the next action (e.g., *"Investigate the Basement"*).
    - Gameplay segments are short, focused, and designed to teach mechanics one step at a time.
3. **Cutscene → Task Loop**
    - Characters converse, provide story context, and hint at what needs to be done.
    - Once dialogue ends, the task panel appears, guiding the player toward the next interactive element.
    - This loop repeats until the conclusion of the case.

Learning Goals (FTUE):

- **Interaction:** How to investigate locations and collect clues. Analysing clues.
- **Progression Flow:** Understanding the rhythm of cutscene (story) → task (gameplay).
- **Narrative Engagement:** Establishes character relationships and sets player expectations for future cases.

6.1. Cases Links

Case 1 : The Royal Crown of Dholakpur
Case 2 : The Haunted Manor Mystery

6.2. Items and Environments in each level.

Case 1:

Level	Environment	Key Items
1	Palace Courtyard	Broken Security Camera
2	Palace Courtyard	Glass Shards
3	Guard Quarters	Envelope
4	Archive Room	Crown Blueprint, Security System Map

Case 2:

Summary:
Bheem and Chutki arrive at the eerie Silent Manor after reports of hauntings. Inside, they find strange ritual symbols, masks, and smoke residue all proven by forensics to be modern fakes.
Their search uncovers bloodied ropes, forged manuscripts, and chemical vials, revealing that someone has been creating the illusion of ghosts. Suspicion falls on the historian who owns the house.

During interrogation, the historian admits he staged the hauntings to keep people away and preserve the Manor's "mystery." When a villager trespassed, he trapped the man in a secret underground chamber where the man later died of starvation.
Bheem and Chutki find the chamber beneath the west wing, along with the victim's remains and proof of the crime. The historian is arrested, and the truth behind the "haunting" is exposed:
There were never any ghosts, only guilt, cruelty, and silence.
Case Closed.

Levels:

Level	Environment	Key Items
